

IN THE SPECIFICATION

Please replace paragraph **[0001]** with the following amended paragraph:

[0001] This application is a continuation-in-part application of and claims priority to pending U.S. Patent Application No. 10/336,443, filed January 2, 2003, now U.S. Patent No. 7,191,193, entitled "AUTOMATIC DIGITAL MUSIC LIBRARY BUILDER."

Please replace paragraph **[0028]** with the following amended paragraph:

[0028] A hand-held container for video with associated meta-data is described. The hand-held container for video includes a casing, a memory housed within the casing storing digital video with associated meta-data, a digital-to-analog video converter housed within the casing, and a transfer socket on the casing through which a video and meta-data associated therewith is transferred to a television transmitter.

Please replace paragraph **[0053]** with the following amended paragraph:

[0053] Embodiments of the present invention provide a system that enables the listener to automatically digitally record each broadcast song into a digital music library and index each song according to genre, song title, artist and album title, as described below. Additionally, embodiments of the present invention enable the listener to filter songs to be automatically recorded by specifying, inter alia, a genre, ~~song title~~ title, or artist, instead of recording all of the broadcast songs. The listener need not be present while the system is in operation. Embodiments of the present invention enable automatic generation of large libraries of songs.
